

COOL FEEL

Air cooler System -40 C

adopts advances refrigeration technology to produce cool wind. It can cool epidermis, release pain and extend working ti

We investigated the influence of cold air cooling at different skin temperatures on therapeutic outcome and side effects of pulsed dye laser treatment of facial telangiectasia.

Unlike other cooling methods, such as contact cooling, cryogen spray or ice packs, can cool the epidermis before, during and after the laser energy has been applied, without interfering with the las

- . Alex - Ndyag treatment
- . Q-switch Laser treatment
- . Pico laser treatment
- . Fractional co2 laser treatment.
- . Laser hair removal treatment etc.

Which is intended to minimize pain and thermal injury during laser and dermatological treatments and for temporary topical anesthetic relief for injections and 100 % Cooling Down the skin during treatment, get more comfortable.
