

Endo Slim

EMS RF+Endo Shape

Using HI-EMT (High Energy Focused Electromagnetic Wave) technology to continuously expand and contract autologous muscles and carry out extreme training to deeply reshape the internal structure of the muscle, that is, the growth of muscle fibrils (muscle enlargement) and produce new protein chains and muscle fibers (muscle hyperplasia), so as to train and increase muscle density and volume. The 100% extreme muscle contraction of HI-EMT technology can trigger a large amount of fat decomposition, Fatty acids are broken down from triglycerides and accumulated in fat cells.

Features and Benefits

1. Builds muscle & Burns fat Together
2. Non-invasive buttock lifting procedure
3. Suitable for everyone - No anaesthesia - No surgery
4. Only a 30 minute walk in walk out procedure
5. Only 4 session needed 2-3 days apart
6. Feels like an intensive workout
7. Safe with No downtime
8. Instant results but gets better after two to four weeks
9. 16% average increase in muscle mass
10. 19% on average fat reduction

Ball Roller: Silicone balls: for lifting; Metal balls: for lymphatic drainage.
